

Welcome

Welcome to first issue of the ROADMAP newsletter!

The **Real world Outcomes across the AD spectrum for better care: Multi-modal data Access Platform (ROADMAP)** project kicked-off in Barcelona half a year ago. Since then, the ROADMAP team welcomed two new partners Takeda and Lundbeck to empower this ground breaking initiative.

On 23 March, the Consortium gathered for its 2nd General Assembly Meeting (GAM) in Barcelona, Spain. I must say, it is wonderful to know how active our partners are and to see such a passionate and strong collaboration, working towards the shared goal of improved care for people with Alzheimer's disease (AD).

The quarterly newsletter will give updates on ROADMAP's events, achievements, scientific involvement and other news, and will also include a pick of the season from social and/or scientific media. It will be published via the recently-launched ROADMAP [website](#).

In this first issue, the 2nd GAM will be recapitulated and you will have the opportunity to gain some insight into how the University of Oxford is involved in ROADMAP, and as an added bonus we'll introduce the new representation of the ROADMAP project on [ResearchGate](#).

Enjoy!

John Gallacher

Project Coordinator, Director of the MRC Dementia Platform UK and professor of Cognitive Health at the University of Oxford
